PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer (Fresher) with hands-on experience building responsive web applications using HTML, CSS, JavaScript, React.js, and Firebase. Strong understanding of component-based architecture, state management, DOM manipulation, and REST API integration. Passionate about creating scalable, user-friendly interfaces and deploying production-ready applications using Netlify and GitHub.

Education

Bachelor of Technology (B.Tech) Computer Science Engineering Medicaps University, Indore

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Backend Database: Firebase (Authentication, Firestore)

Concepts: Responsive Web Design, Component-Based Architecture, State Management (useState), API Integration, DOM Manipulation

Tools: GitHub, Netlify, VS Code

Projects

Quiz Application (Admin + User Panel)

Developed a quiz web application using React and Firebase

Implemented admin dashboard to create, update, and manage quiz questions

Built user panel with dynamic question rendering and real-time score calculation

Integrated Firebase Authentication and Firestore Database

Implemented responsive UI for mobile and desktop users

Deployed the application using Netlify

Tech Stack: React.js, JavaScript, Firebase, HTML, CSS

Job Application Tracker

Developed a job tracking dashboard to manage job applications

Implemented Firebase Google Authentication for secure login

Built a dashboard displaying total applied jobs, interview count, and rejected applications

Implemented CRUD functionality to add, edit, and delete job applications

Designed a status system: Applied, Interview, Offer, Rejected

Added search and filter functionality by company and status

Implemented responsive UI and dark mode for better user experience

Deployed the project using GitHub and Netlify

Tech Stack: React.js, JavaScript, Firebase, HTML, CSS
